-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2834

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1-4 and 7-16 rejected under 35 U.S.C. 103(a) as being unpatentable over Miyazawa (393)). Miyazawa figures 7 and 13 clearly show a vibration element which includes first and second piezoelectric element's that undergo extension and contraction when supplied with an appropriate AC signal. An arm portion ((68)) and a contact portion (66)) are also shown. In Miyazawa does not disclose any specific dimensions. However, it has long been held that optimizing a known structure (for example through routine experimentation) is within the skill expected of the routineer. Thus, arriving at a specific longitudinal dimension (e.g 1-20mm) would have been obvious to one of ordinary skill in the art.

Claims 1-16 are rejected under 35 USC (a) as being obvious in view of Miyazawa (223). This reference teaches (see figures 3, 6, 7, 9, 13, 15-18 and 20-22) all of the claimed features except

for the longitudinal dimensions. As noted above, selection of specific dimensions would have been obvious to one of ordinary skill in the art. Regarding claims five and six which read on applicants figure 28, please note figure 15 of Miyazawa (223).
